

## Biography

If in one territory of the Iberian Peninsula is associated the electronic music is with Levante. There he gives the best quotes of the dance music scene of the continent.

A scene in which his players have evolved from the basic rhythms of the 90's to the more sophisticated and modern trends, keeping with the demands of the best clubs and festivals worldwide.

Within that scene in recent years has emerged the DJ and producer Indy Lopez, who with more than 18 years of experience in the dance music world, convert his performances a unique event, full of magic and entertainment with his sound "fresh and energetic".

Indy enters the world of music in the early 90s in a small radio station in his hometown (Radio Sol Albal) where with only 13 years thanks to friends and colleagues took contact with the varied sounds of the time.

As a result of being too young to work in night clubs, he was constantly looking for a way to stay in contact with the public, organizing private parties for his friends or at school, where he continued with studies, while enjoying to the max. The parties that the radio station organized at small clubs, local bars and outdoor.

Upon becoming old enough to work and thanks to the great popularity of the radio program, he earned his first resident DJ position in AMD Amadeus, becoming the youngest DJ in Valencia, at only 16 years old and playing huge sessions for over 3000 people.

Years later he relocated from the city in order to form part of "Onda Mediterráneo Gandia" as the music and program contents director of the well known radio station forcing him to leave his position as resident DJ and start his journey as a freelance DJ.

The attraction he felt towards the nightlife and the restlessness to return to the club scene, saw him return to the city of Valencia in order to accept a position under the direction of Banannas Maxidisco where he not only organized parties for thousands of people but also represented the label as a DJ on a national tour..

The projection and success of Indy during these years was unstoppable and he collected positions as resident DJ one after another in clubs such as Zenith, Havana, DJB, K-sim, Queens...etc and their regular sets all over Spain.

Indy demonstrates his creative character together with his brother and partner, Marck db in the business Group (GrupoMZ) which offers.....

..a variety of services for the night life scene and music like (Musiczone records) music store and DJ accessories "These days, they have disappeared with the fall in the market" (Electroacústica MZ) Installations, sale and hire of sound and lighting teams (Sool Management & Bookings) an agency which has discovered artists such as Peter Gelderblom, Rene Amesz or Groove Garcia ,and (Global Hard Dj's) Events and festivals producer.

In 2005 its constant evolution led him to create his own recording studio (Underground Studios Valencia) Where unleash their creativity and passion for music, but it's not until 2007 and after a long apprenticeship, when his first reference see light through the label "Klubbers"(Italy) The Underground" (Supported from great dj's as Roger Sanchez that presents this track as one of the major themes of the season in Ibiza in their radio.

His productions and remixes as Indy Lopez or as a duo with his brother and partner Marck Db "Mr.Lopez & dB" add fans around the world.

As a reward for a job well done, in 2008 the international artist "Noelia" singer of "TU", "Como duele" and "Candela" (Hit summer in Spain and Italy) and with more than 5 million albums sold to back, Instructs to Indy and Marck the remixes of his first single in English, "Caribbean Queen Reloaded" theme popularized in 1984 by Billy Ocean, that not only is recovered by Noelia, also has been adapted to our time and turned into a real hit..

The public response is not expected and sells more than 50,000 downloads in its first day on sale, and to achieve recognition of the most prestigious dj-Pool, charts and radios in the U.S. and Latin America, boosting its projection much higher levels and international.
